

Overview of the marathon course

Marathon athletes, delegations, and coaches participating in the Tokyo 2025 Deaflympics

1. About the marathon course at the venue

Overview

- The marathon venue plans a course that circles the Tokyo Expressway (2 km one way) and the Yaesu Line of the Metropolitan Expressway (0.5 km one way) at a distance of 5 km per lap.
- The Tokyo Expressway is currently in service as an expressway, but will be decommissioned as a road on April 5, 2025. This will allow the competition to be conducted safely in a closed environment without fear of crossing with cars.
- Since this course has not been used for a marathon event before, we are preparing to sign a contract with a measuring contractor and to receive soon the certify the course.

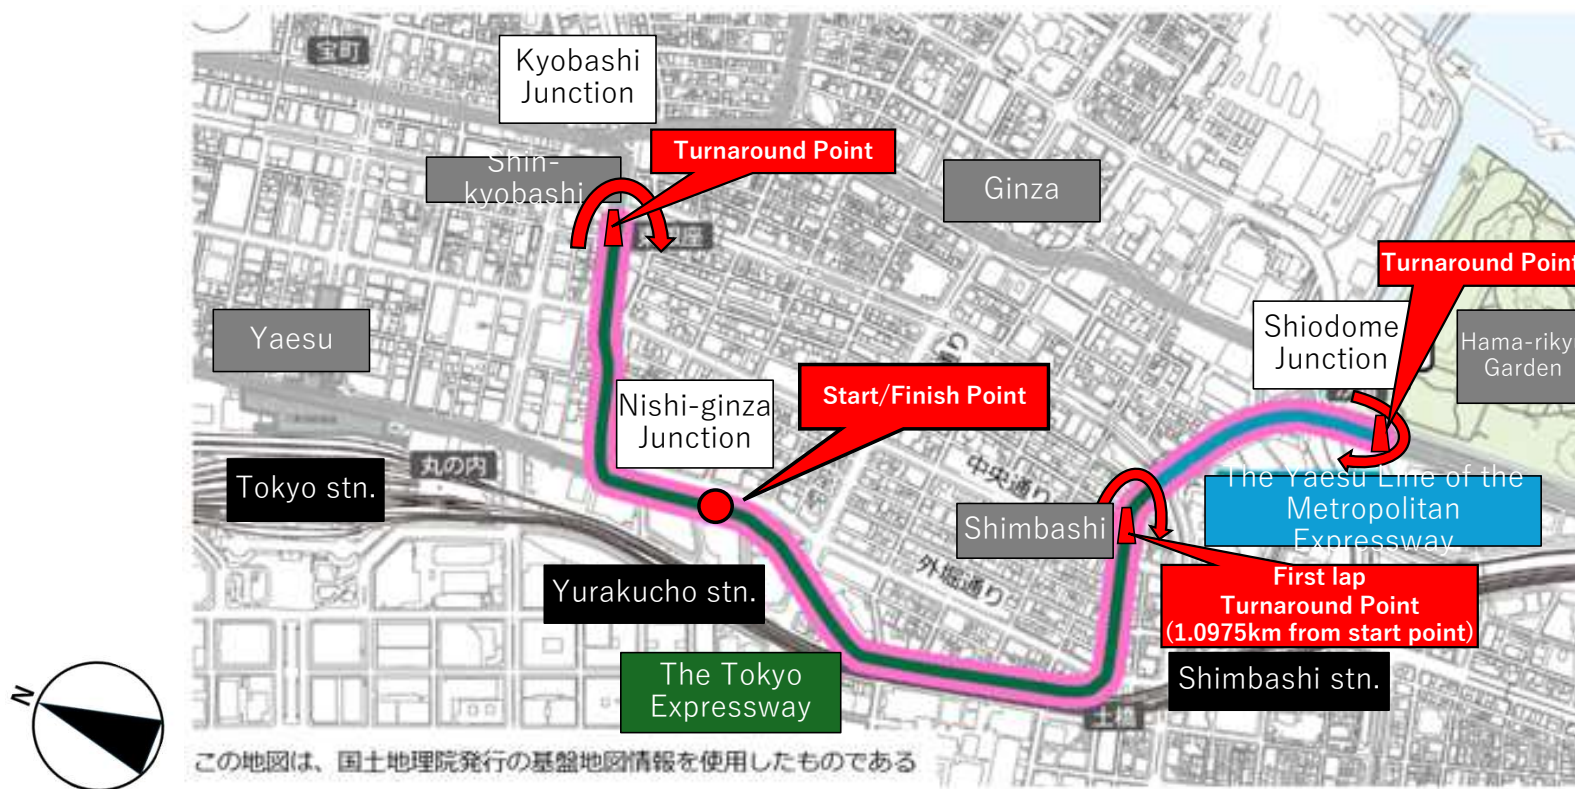

Above is a photo of the area near the start/finish line

2.The Plan of the marathon course

Note: This plan is based on the process required to obtain official certification for the marathon course.

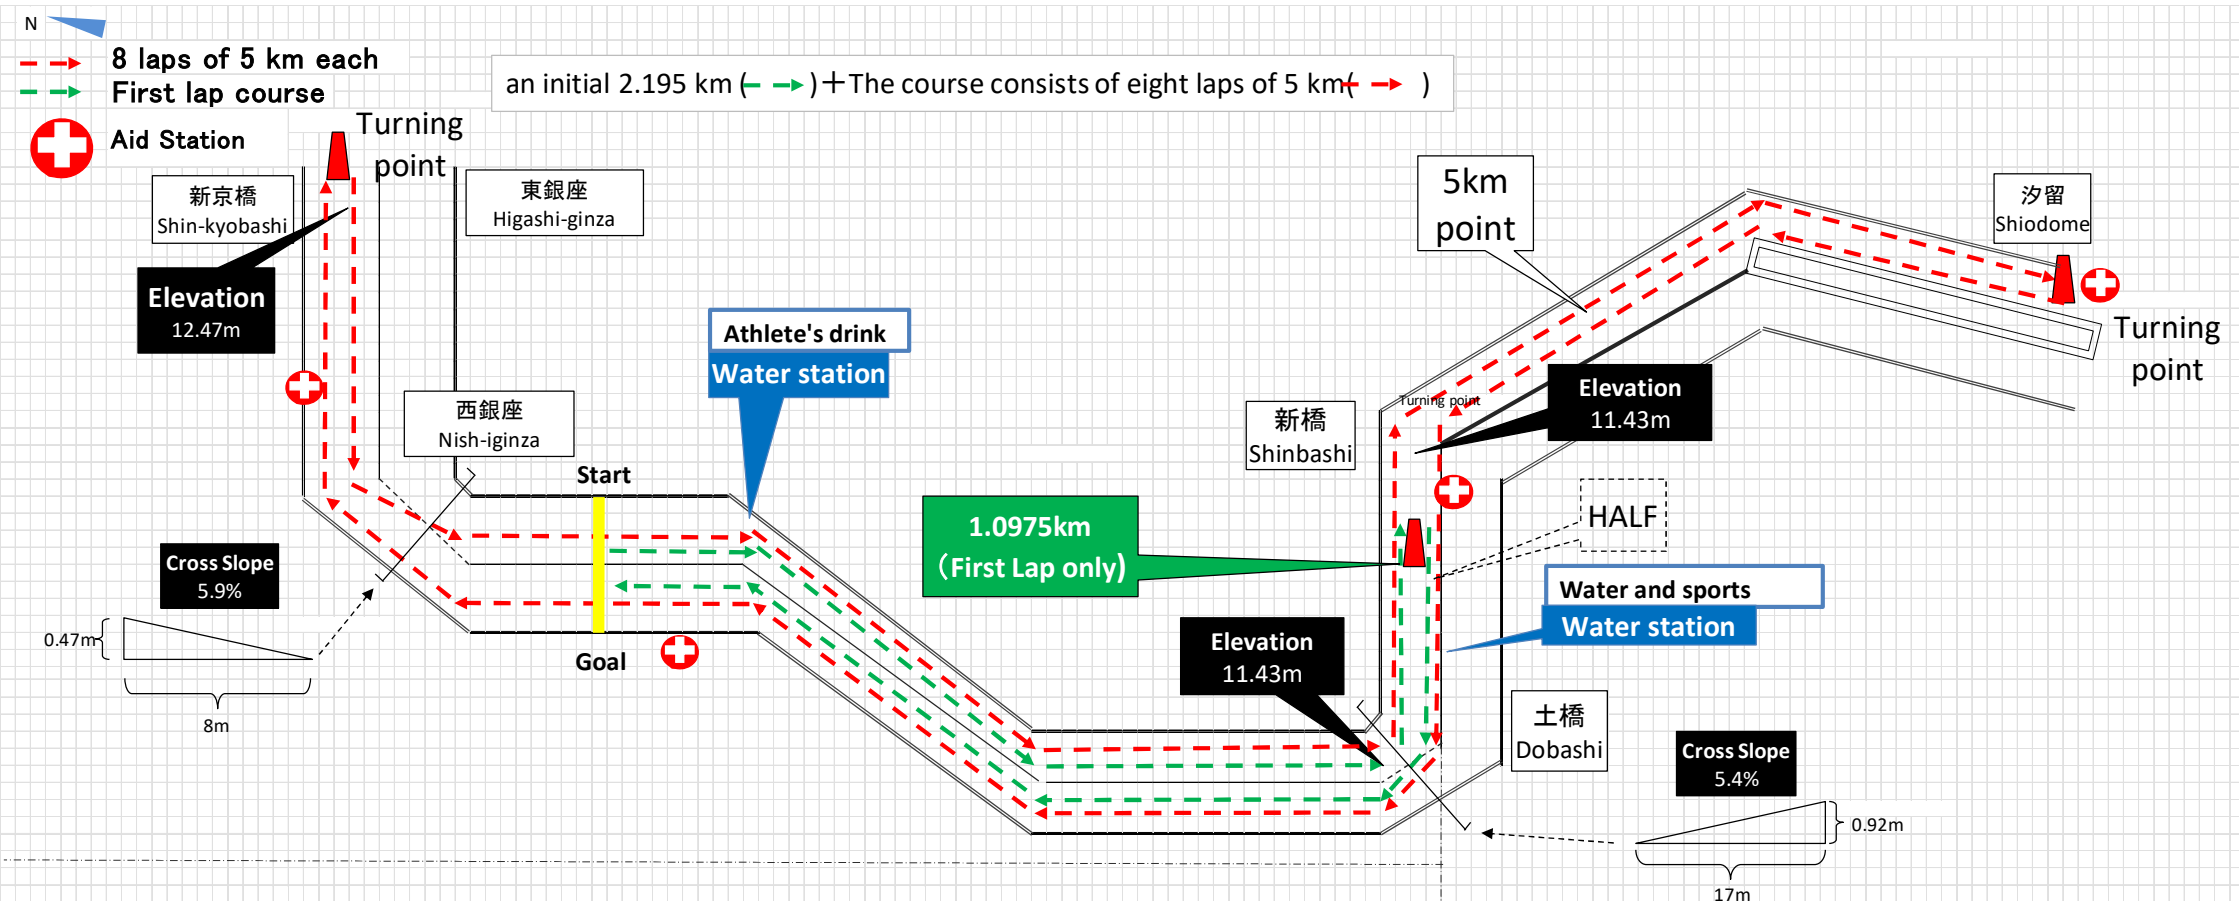

-  :The Metropolitan Expressway
(2 km one way)
-  :The Yaesu Line of the Metropolitan Expressway
(0.5 km one way)

2. The Plan of the Marathon Venue

Bus...  Athletes... 

Athlete parking (Proposed)

- We are considering the idea of parking two buses at the Marunouchi Kajibashi parking lot and having the athletes board and disembark in the parking lot
- The buses will be escorted by an escort to the start/finish area, which is about 400 meters away, and can be accessed on foot in about 6 minutes.
- Depending on future adjustments, the parking and loading/unloading areas may be changed.
